

Proposed resolutions for the IUPAP GA in Singapore, November 2014 concerning the continuation of the working group on energy, WG 12.

- The WG 12's work should continue for another period of 3 years.
- Inactive members should be replaced, and new members should be chosen by the Chair to fill gaps in the expertise that is needed to produce further Briefs that are felt to be important (taking into account geography, gender).
- If possible, provide a budget for the group (one person attended the meeting in Oslo at his own expense).
- The existence of the Briefs should be publicised (with whatever disclaimer is felt necessary), and persuade the world's Physical Societies to do the same.
